

OrthoChart Cloud New User Pricing

We are currently offering a special pricing for new OrthoChart clients that choose to use our Cloud program. The cost to access and use OrthoChart Cloud is based on the number of users you need connected at any one time. If you only need 1 user connected then you would pay for 1 user. There is an initial setup fee of \$499 and the cost for each user is \$1,000. You can add additional users at any time. Keep reading for more information and feel free to contact us at 1-800-231-7945 for information. We look forward to working with your practice.

Cost: \$1,000 Per User

Start with any number you want and add additional users at anytime for the same price. Example, if you have 3 computers but no more than two will be using OrthoChart at one time, then you only need 2 user licenses. There is also a \$10 per month, per user fee. After 1 year there will be an annual \$500 fee for updates (this is a standard OrthoChart and is not based on the number of users).

What You Get: The Full Version Of OrthoChart

- Full version of OrthoChart on our cloud server.
